

SECTION D

Traymore, Belvedere Room (11th Floor)

Protein Conformation I

J. Steinhardt, *Presiding*

- 2:00— Introductory Remarks. **J. Steinhardt.**
- 2:05–113. Detailed Mechanism(s) for the Denaturation of Serum Albumin by Urea-Type Agents. **S. Katz, J. Denis.**
- 2:20–114. The Intrinsic Microheterogeneity of Plasma Albumin. **K-P. Wong, J. F. Foster.**
- 2:35–115. The Specific Volume Dependents of Ribonuclease on Pressure. **P. F. Fahey, Jr., D. W. Kupke, J. W. Beams.**
- 2:50–116. Relationship of Protein Structure to Binding of Hydrocarbons by Aqueous Solutions of Proteins. **A. Mohammadzadeh-Khayat, L. M. Smith, R. E. Feeney.**
- 3:05–117. The Binding of Indole and Cu+2 to Chymotrypsin, as Measured by Difference Spectroscopy. **M. T. Barnhill, Jr., C. G. Trowbridge.**
- 3:20–118. Binding of a Fluorescent Dye by Denatured Proteins. **M. Burgess, K. M. Pruitt.**
- 3:35–119. Dodecyl Sulfate Binding by β -Lactoglobulins. **T. S. Seibles.**
- 3:50–120. The Association of Desoctapeptide Insulin; Absorbance Changes. **F. Gubensek, J. A. Rupley.**
- 4:05–121. Interaction of Polyions with Actomyosin Suspensions. **G. Kaldor, P. Chowrashi.**
- 4:20–122. Limitations Inherent in the Δ pH Method of Determining Binding Isotherms of Bovine Serum Albumin. **J. M. Cassel, J. Steinhardt.**

AUG. 5, 1968 C&EN 101

P. F. Fahey, Jr., D. W. Kupke and J. W. Beams, "The specific volume dependence of ribonuclease under pressure," Biological Chemistry Abstracts of the 156th Am. Chem. Soc. Natl. Meeting, Atlantic City, NJ, p. 115 (1968d) [Chem. Eng. News., **46**(33), 101 (1968d)].
